

YUPO Jelly

YUPOJelly®

▶ A NEW TEMPTATION TO CLEAR YOUR CREATIVE APPETITE

YUPOJelly® sticks to flat surfaces without adhesive and is easy in handling. Its base material is a crystal clear film and its surface has been developed for UV silk screen, UV digital and UV offset printing. YUPOJelly® has also a clear micro structure on the back side that sticks to any flat surface without adhesive or bonding agent. Stickers made of YUPO Jelly® are easy to apply and easy to remove. YUPO Jelly® is free of PVC, 100% recyclable and therefore environmentally friendly.

- ✓ Special handling or application is not required.
- ✓ Easy to stick on and easy to remove.
- ✓ No glue, no sticky feeling.
- ✓ Reusable.
- ✓ PVC free and therefore environmentally friendly.

▶ PRINTING AND USAGE INSTRUCTIONS

YUPO Jelly®'s product surface is designed for UV silkscreen, UV digital and UV offset printing.

- ▶ For silk screen printing, use compatible inks.

- ▶ YUPOJelly® will print very well with all the existing UV digital machines in the market.
- ▶ It is possible to print with opaque white. Double pass opaque will give better results when double sided image used.
- ▶ Acclimatize the product before printing.
- ▶ Prior to printing always handle YUPOJelly® with gloves to avoid marks during printing.
- ▶ Not suitable for sticking on 3D objects.
- ▶ Do not apply YUPOJelly® on glass with steel net wire. The glass might break due to thermal insulation.
- ▶ Do not apply YUPOJelly® directly on display screens. It may cause damage to the screen.
- ▶ Wet application is also possible.

▶ Not recommended for outdoor usage or as car stickers

▶ Clean the mounting object carefully before applying YUPO Jelly® to avoid bubbles.
