

Kongsberg V series

Produce the quality you've always wanted

The Kongsberg V is an entry level cutting table that offers durability, precision and ease of use at an attractive investment level.

The Kongsberg V is a cutting table that stands for value, durability, reliability, precision and ease of use at an attractive investment level.

The Kongsberg V cutters come in standard configurations for sample making, signage and display production. The Kongsberg V offers a broad selection of tools, providing quality results on a wide range of cutting, creasing, and plotting tasks. No matter what application, the Kongsberg V brings the value you are looking for.

KONGSBERG V FOR PACKAGING SAMPLE MAKING

The Kongsberg V for packaging is a cutting table configured for sample making, short run production of mockups and other packaging specific applications. This table is outfitted with a FLEXIHead.

KONGSBERG V FOR SIGNAGE AND DISPLAY PRODUCTION

The Kongsberg V for signage and displays comes with a MultiCUT tool head offering milling productivity and a camera system. The MultiCUT combines all the tool insert options with a milling spindle up to 45.000 RPM. It's perfect for a wide range of signage materials. The air-cooled milling bit assures edge quality during high-speed milling of acrylics and other synthetics. The switch-operated bit exchange eliminates the need for hand tools.

KEY BENEFITS

No errors - automatic bar code identification of the cutting tools prevents operator errors.

Memorising - powerful system for memorising job setups.

Accurate - all Kongsbergs are made to last. The strong construction allows perfect accuracy.

Safety - very efficient advanced dynamic safety system complies with international regulations.

Versatility - wide range of speciality tools and control functions for speed, power and flexibility.

Design library (optional) - direct access to huge packaging design library.
